How much better the Plaza is looking since Garfield has had the chain gang at work on it. The trees which were set out two years ago

are already large enough to shade the walks, and only one thing is needed—a crop of alfalfa on the bare plots between the pathways.

Let the city authorities give some man the right to irrigate it and plant alfalfa, keep it in order and take the alfalfa for his pains. It appears to us that some one could be found willing to do this, and in one year's time we would have a green, shady park which would surpass any spot in the Territory.

The prosecution introduced several witnesses as to the facts. Roney was the sole witness for the defense, and without denying the facts, he simply denied that his action tended to create a riot or breach of the peace. The court stated the law in the case, which was submitted without argument. In a few moments the jury came in and rendered a verdict of "not guilty," contrary to the law and the evidence.

Pacific Grove Retreat, California.

DEAR HERALD: Your occasional correspondent being kindly taken into full membership by the Pacific Coast Press Association, he very gladly became one of the large number of members of the association who visited this place on the annual reunion of the association.

But where is Pacific Grove Retreat? It is two and one-half miles from Monterey, on the ocean's edge. Monterey and vicinity is the Saratoga of California, a very popular summer resort or watering place for weary and worn-out humanity, where their wasted energies can be quickly recuperated and their flagging spirits speedily revived.

The Southern Pacific Railroad Company has been the principal promoter in inaugurating and building up the convenience hereabouts for the health and pleasure of restful men and women. The company runs two regular passenger trains daily to and from Monterey to accommodate the rapidly increasing travel to and from this locality.

Monterey proper is an old Spanish town, the first capital of California and was founded over one hundred years ago by the old missionary fathers. The spirits of these old fathers seem to linger about the ruins of the old town.

Pacific Grove Retreat is situated immediately upon the beautiful beach two and one-half miles below Monterey in the midst of state pines, which afford safe protection from storms of wind and the rays of the heating sun. The grounds are admirably arranged for purposes of health to body and safety of life. No riding or driving whatever is allowed in the grounds except for necessary business purposes, therefore even very small children are perfectly safe from harm from that source. The water supply and drainage is full and complete, and no garbage or unhealthy matter is allowed to be carelessly cast upon the streets or grounds.

No persons are permitted to sell poisonous beverages upon or in the vicinity of the grounds. Even ordinary social dancing is forbidden. In short, the grounds are laid out and managed upon the most liberal and approved plans to secure health, rest, safety, and good morals. Families planning to spend several weeks or months on the grounds can either rent ground room and erect tents to live in for the time being, buy lots and erect cottages of solid comfort and home conveniences. The manager of the grounds keeps cottages and tents all furnished with bedding, etc., to be rented to those who prefer that plan. Living is just about as cheap as at home.

Near the town of Monterey and but a very brief distance from the depot is the Hotel Del Monte, a magnificent and commodious structure erected for the express purpose of accommodating those persons as may desire a more extravagant and fashionable manner of living. Driving, hunting, fishing, bathing, etc., are the usual pastimes for the visitors at the Hotel Del Monte and Pacific Grove. Bathing in the beautiful surf of the sea and elegantly furnished bathing houses seems to be the principal pastime of many of the health and pleasure seekers on these grounds. The sea breezes are delightfully refreshing, especially so to a sun-dried and desert-burned Arizona. If the Phoenixites could spare the time and money to enable them to spend one or two of the heated months of the sunny summer of that section, it would become almost a heavenly delight to them. More anon, perhaps. "Ari."

ARIZONA AS IT IS.

An Interview with Ex-Territorial Secretary Gosper.

For some days past the Hon. John J. Gosper, Territorial Secretary of Arizona, has been stopping at the Baldwin, on a flying visit to California. The gentleman has been intimately connected with the political and commercial life of Arizona since 1877, and in conversation with a Chronicle reporter yesterday spoke very highly of the prospects of Arizona. "I have determined to make my home there," he said. "Like all who have moved into the Territory in the last few years, I intended to return to California as soon as I should have made my stake; but I have different ideas and intend to remain. The country is rich and growing. Its resources are discovered to be more ample than at first supposed, from year to year, and, as a consequence, the population is becoming more settled. A large amount of capital is finding good investment, and I am only sorry that the California capitalists have been so slow to seize upon the field which lay open to them. Eastern moneyed men have looked upon the Territory with much more favor from the beginning, to the detriment of California, which lost much of our trade in consequence. Still, the people nurse the sentiment that they belong to the Pacific coast, and the feeling that San Francisco is our market is daily growing. I please me much to be able to say that your business men, who have so long looked upon the Territory

with suspicious eyes, are now inclined to encourage and foster trade with us. Eastern merchants control already a good slice of it, but with the natural advantage which San Francisco has over St. Louis and Chicago, it would not be difficult for you to drive them out of the field."

THE UNAPPREHENDED APACHE.

"Do the Indians troubles interfere to any extent with the prosperity of the country?"

"They certainly have had a retard influence upon several sections of the country. But we are not inclined to take any half-hearted measures concerning them, and since General Crook has been directed to take charge of Indian affairs there are but few who doubt that all our troublesome Indians will soon be reduced to a state of quiescence."

"And how about the white Indians—the cowboys?"

"That matter seems but poorly understood among you. The cowboy element is certainly a bad one, but it is one for which the better and more intelligent classes are entirely responsible. The cowboys are really nothing but what you call ward politicians, and the fights in which they so often become engaged arise out of the scramble for the local offices among them. Our local officials do not represent the best class of our population, which is working for a living while these people are allowed to manage local affairs. If the more intelligent men would take a livelier interest in these matters, and would not allow a lot of irresponsible fellows to do just as they pleased, you would hear very little of cowboy fights and depredations. You understand of course, that there is but little of social life among us. They come here only to make fortunes, few expect to stay, and few found homes and rear families. But these drawbacks will disappear in course of time, and as the country is found to be good for something else besides mining, we shall soon have a population which will settle for good and ever."

THE FRUITFUL PHOENIX COURTY.

"For instance, the valleys about Phoenix are as fertile as those of the San Joaquin and Sacramento rivers, and I am certain that as soon as railway communication is more general these lands will be fully cultivated. Phoenix I regard as the most promising town in the whole Territory. Its inhabitants now number 3,000 and there is a constant immigration."

"How is the political situation, Mr. Gosper?"

"It is somewhat mixed. There were no political organizations until two years ago, when an attempt was made to conduct the Congressional campaign a little more systematically. The Territory, I suppose is claimed to be Democratic, though, as I have said before, I believe it to be wholly uncertain and rather mixed. Party lines have not been closely drawn, and the Republicans will enter the field in the coming campaign with all the confidence born of the certainty of victory."

"You are going to run for Congress, are you not?"

"I may possibly, but I am not yet certain. My material prospects just now are very promising, and I should consider political honors as but a poor equivalent for the loss of the former. My friends are urging me very strongly but I have not yet decided. If I enter the fight I shall of course try to win it."

"Mr. Gosper left for Monterey yesterday afternoon with the Pacific Coast Press Association excursion, but will return to this city before starting for home.—[S. F. Chronicle, July 19.]

An Extraordinary Offer.

There are a number of persons out of employment in every county—yet energetic men, willing to work, do not need to be. Those willing to work can make from \$100 to \$500 a month clear, working for us in a pleasant and permanent business. The amount our agents make varies, some making as high as \$500 a month, while others make as low as \$100—depending on the energy of the agent. We have an article of great merit. It should be sold to every House-owner, and pays over \$100 per cent profit. Each sale is from \$3.50 to \$10.00. One agent in Pennsylvania sold 32 in two days, and cleared \$84.00. An agent in New York made \$45.00 in one day. Any man with energy enough to work a full day, and will do this a full year, can make from \$2,000 to \$3,000 a year. We only want one man in each county and to him will give the exclusive sale as long as he continues to work faithfully for us. There is no competition, and nothing like our invention made. Parties having from \$200 to \$1,000 to invest can obtain a General Agency for ten counties or a state. Any man who can make an investment of from \$25 to \$1,000, without the least risk for loss, as our Circulars will show that those investing \$25 can after 30 days trial return the goods unsold to us and get their money back, if they do not clear at least \$100. They show that a General Agent who will take ten counties and invest \$250.00 can after a trial of 30 days return all goods unsold to us, and have money returned to them, and if they fail to clear at least \$750.00 in that time. We are not paying salaries, but want men willing to work and obtain as their pay the profits of their energy. Men not willing to work on our terms will not work on any. Those meaning business will receive our large descriptive circular and extra-ordinary offer by enclosing a three-cent stamp, with their address. The first to comply with our terms will secure the country or counties they may wish to work. Address: RENSSELAIR MANUFACTURING CO., 118 Smithfield street, Pittsburgh, Pa.
